fotomakr®   *infinite variations*

Here are some suggestions, please read them before you start working.

Thank you, that you have opted to our **fotomakr**. "fotomakr" and "aco color fan" are tools for Microsoft Windows WIN7 and later.
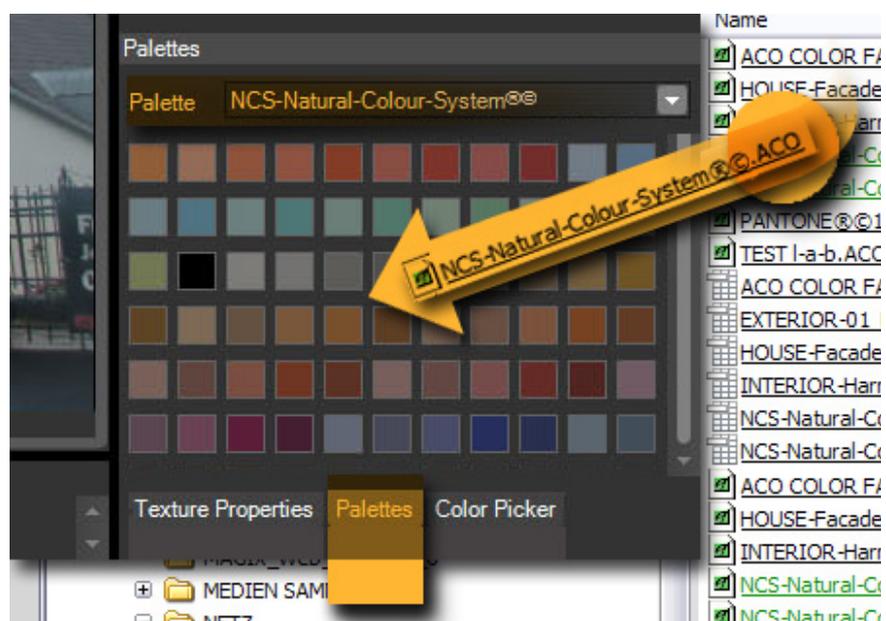

Install the programs in which you fotomakr.exe the file start. Follow the instructions on the screen to perform the automatic installation process. Choose a location on your computer, is to lie in which the respective program. It is the location that Microsoft specifies default and in which other programs are installed, proposed.

In case of problems you can reach us at *service@fotomakr.com*.
Now you have installed the program successfully.

The 3 ACO pallets are in your Documents folder "fotomakr" under / Palettes and stored in the program itself under the right underlying tab called "Palettes" to open.

If you want to create or buy further ACO color swatches, you can copy all already existing .aco palettes via drag-and-drop in this "Palettes" Tab.

Search on your computer.

Often you can find free aco-files from well known companies online, especially from coating industries. Or visit http://www.colourlovers.com/ . Or create new palettes from excel data with our "aco color fan".

You need prepared and programmed photos to import them in fotomakr.

Whether with your own photos, or photos of FOTOLIA.com, SHUTTERSTOCK.com, DREAMTIME.com, iSTOCKPHOTO.com and many other stock photo agencies.

Every design you prepare seamless you could import in fotomakr every time.

You create your individual product presentation and pre-press-photos.

This serves our Photoservice to make new edit photos. You then vary the free and independent infinite, can prove with your own products and designs. Your own textures, fabrics, pattern, surfaces and wallpapers now free for import in fotomakr.

Fotomakr 2 professional *freeware:*

1.)   select the object THUMB left side

2.)   selcect one of YOUR textures

3.)   make adjustments right to your texture

4.)   confirm it with your   RETURN ↵   Enter/Eingabetaste, or *Mouse click* on big Texture right side

Fotomakr Pro 2.1 Licenseversion, over 25 new functions (coming this year)

1.)   select first one "Objekt Thumb" layer

2.)   select one Texture (yellow Border)

3.)   select Dimension, Repeat, for your selected Texture

4.)   confirm it with your   RETURN ↵   Enter/Eingabetaste,

          or *Drag-and-Drop from Texture Folder* direct to "Object Thumb".

Please wait, if you not see your updated texture directly. Often it took time to calculate and present complex simulation with more repeats and multiplications.

- „Esc"-Taste deletes the yellow „Highlight" from each object.
- With the right mousefinger tip on "Object Thumb" left and choose "Remove". You can remove a texture you placed there before.

- Rounded 28 pixels of a texture are 10 millimeters in the photo and so in real life than product (10 mm in 72 dpi = 28,38 Pixel).

- 28 pixel in 72 dpi are = 10 mm (1 cm) in reality and in our Fotoreality inside the fotomakr. 36 pixels are approximately half an inch. Use our free TEXTURES to test it!

- Dont expand dimensions to your Texture inside fotomakr. Because after that the quality goes down.

- If you want to restore the original settings, simply delete the corresponding file in the pfi. When you restart the fotomakr file sets with the information contained in the texture size from scratch several times.

- If you for some designs / textures need different placing points or sizes, so you can simply copy the file in the folder (outside the fotomakr!). Then name the file with a new name or simply a numbering at the end of the old file name. So you have different settings for the same file as Differences of a design on pillows and bedding.

- Fotomakr imported JPEG, BMP and PNG with transparence (e.g. for cut out Logos, Single-Rugs). Please remove the color profiles, to become a real basic for further manipulations.

- We are with our services just on the start line and ask for your patience, we are working on our blog.

Thank you for your interest.
